AAA NETWORKS, *established in 1992 as Washington's premier business communications provider, offers you a single-source for your company's data, voice and video requirements. We provide our clients with cost-effective solutions that meet their needs.*

DATA NETWORKS

As the DC Metropolitan area's leading Cisco Silver partner and systems integrator, we sell, configure and install routers, network switches, wireless products and security solutions for your local and wide area network needs. AAA Networks specializes in designing and building Cisco IP telephony with Unified Messaging and Voice Over IP applications. We have in-house expertise and experience with Cisco's AVVID architecture, the foundation for tomorrow's converged data, voice and video networks.

AAA Networks is a premier storage solution provider and is the official EMC demo facility for Northern VA. We also offer high-end server/storage solutions from Compaq, HP, IBM and Dell and offer software solutions ranging from Microsoft, Novell, Veritas as well as thin client technology from Citrix.

Our professional service offerings include onsite network support and administration, network assessments, security audits as well as intrusion detection and monitoring services. Finally, we can tie our entire solution together with data/voice cable installation.

TELEPHONE SYSTEMS/IP TELEPHONY SOLUTIONS

AAA Networks provides NEC PBX and Cisco IP Telephony solutions. From the traditional PBX to the latest in IP Telephony – we handle it all. These solutions offer Voice Mail, Unified Messaging and ACD Call Center functionality.

VIDEO CONFERENCING

AAA Networks offers a full range of video conferencing equipment and services from Tandberg and Polycom for Telemedicine, Distance Learning, Executive Conferencing and other applications over ISDN dial-up or dedicated bandwidth. We also house a video conferencing rental facility at our corporate office.

CARRIER NETWORK SERVICES

AAA Networks is the largest Verizon agent in the Mid-Atlantic area. We offer a variety of connectivity products ranging from Frame Relay, T1/T3 Point-to-Point Circuits, ISDN, FDDI, Long Distance and hosting services through Verizon/AT&T/Broadwing/Qwest. We can also assist in linking multiple, local buildings with Fiber Optic Cabling in the streets and Wireless solutions through the air.

TECHNICAL STAFFING SERVICES

AAA Networks can provide a full array of highly qualified, and experienced, network engineers, programmers and technicians – 7 days a week – at very competitive rates. AAA Networks also offers complete technical staffing services with a full range of options for our clients. We provide short-term, "temp-to-perm" and permanent placement staffing.

NEXTEL WIRELESS

AAA Networks is a five-star authorized Nextel Cellular dealer – the only wireless product that offers cellular and two-way radio service. This is a perfect fit to our business communication solutions, offering organizations the best way to stay in touch with one of the best coverage areas available.

SOFTWARE DEVELOPMENT

AAA Networks employs today's best-of-breed software development technologies and industry practices to help our clients leverage and transform technological innovations into strategic competitive advantages. We will define and build technical solutions that are most appropriate for your business in relation to cost, purpose and application. Technologies we are proficient in include: SQL Server, MS Access, Web Development, ASP, Java, XML, HTML, and Cold Fusion.
